Glossary of Terms

The following listing includes acronyms and terms used throughout the document.

Term	Definition
Basel III	Basel Committee's December 2010 final capital framework for strengthening international capital standards
BHC	Bank Holding Company
Capital Rules	Capital adequacy standards established by the federal banking agencies
CAP	Capital Adequacy Process
CET1	Common Equity Tier 1
CMC	Capital Management Committee
Company	M&T Bank Corporation and its consolidated subsidiaries
Federal Reserve	Board of Governors of the Federal Reserve System
Form 10-K	M&T's Annual Report on Form 10-K for the year ended December 31, 2024
Form 10-Q	M&T's Quarterly Report on Form 10-Q for the quarter ended June 30, 2025
FR Y-9C	M&T's Consolidated Financial Statements for Bank Holding Companies for the quarter ended June 30, 2025
GAAP	Accounting principles generally accepted in the U.S.
HVCRE	High-volatility Commercial Real Estate
MD&A	Management's Discussion and Analysis
MRR	Market Risk Rule
M&T	M&T Bank Corporation
M&T Bank	Manufacturers and Traders Trust Company
OTC	Over-the-counter
RAS	Risk Appetite Statement
Risk Framework	Enterprise Risk Framework
RWA	Risk-weighted Assets
SCB	Stress capital buffer
SEC	Securities and Exchange Commission
SSFA	Simplified Supervisory Formula Approach
U.S.	United States of America
Wilmington Trust, N.A.	Wilmington Trust, National Association

Background

M&T is a New York business corporation which is registered as a Financial Holding Company under the Bank Holding Company Act of 1956, as amended and as a BHC under Article III-A of the New York Banking Law. M&T has two wholly owned bank subsidiaries: M&T Bank and Wilmington Trust, N.A. The banks collectively offer a wide range of retail and commercial banking, trust and wealth management, and investment services to their customers.

M&T and its wholly owned bank subsidiaries, M&T Bank and Wilmington Trust, N.A., are required to comply with applicable Capital Rules, which are based on Basel III.

Overview

In accordance with Pillar 3 of the Capital Rules, BHCs with total consolidated assets of \$50 billion or more, including M&T, are required to provide market participants certain information regarding their capital adequacy, including a summary of information about: corporate risk management framework and governance; the internal capital adequacy process; and disclosures regarding credit, counterparty, interest rate, and other specified forms of risk. M&T does not meet the criteria to be considered an advanced approaches organization and, as a result, is required to provide disclosures under the standardized approach.

The Pillar 3 Regulatory Capital Disclosures provided within this document or in M&T's filings noted below and referenced in Appendix A of this document are presented in compliance with Sections 61 and 63 of Regulation Q – Part 217, Public Disclosures Related to Capital Requirements. M&T's Form 10-K filed with the SEC contains management's discussion of the overall risk profile of the Company. The Pillar 3 Regulatory Capital Disclosures should be read in conjunction with Form 10-K, Form 10-Q filed with the SEC and the FR Y-9C. The accompanying Pillar 3 Regulatory Capital Disclosure Cross-reference Sheet (see Appendix A) indicates where the required disclosures are located. The Pillar 3 Regulatory Capital Disclosures have not been audited by M&T's external auditors.

Risk Management Framework and Governance

M&T's Risk Framework represents the Company's overall risk management approach, including the policies, processes, controls and systems through which risks are managed. The Risk Framework provides the governance necessary to communicate the types of risk that M&T faces in pursuit of its business objectives. It serves as an integral part of daily operations, business planning and capital planning, and is a foundational component of M&T's risk culture. It encompasses the significant aspects of risk management, and pertains to current and emerging risk considerations. These risks are described extensively in M&T's Form 10-K in Part I, Item 1A "Risk Factors." The major risks facing the Company and described therein include:

- Market Risk
- Risks Relating to Compliance and the Regulatory Environment
- Credit Risk
- Liquidity Risk
- Strategic Risk
- Operational Risk (including legal, reputational and cybersecurity risks)
- Business Risk (including model risk and climate risk)

Detailed discussions of the risks outlined above and other risks facing the Company are included within Form 10-K in Part I, Item 1, “Business,” and Part II, Item 7, MD&A of “Financial Condition and Results of Operations.” Furthermore, in Form 10-K Part II, Item 7, included under the heading “Forward-Looking Statements,” and in Part 1, Item 2 of Form 10-Q under the heading “Forward-Looking Statements” is a description of certain risks, uncertainties and assumptions identified by management that are difficult to predict and that could materially affect the Company’s financial condition and results of operations, as well as the value of the Company’s financial instruments in general, and M&T common stock, in particular.

The Risk Framework supports the identification, measurement, monitoring and reporting of material risks with appropriate governance and oversight, thereby ensuring transparency, consistency and accountability for risk throughout the enterprise and adherence to the Company’s risk appetite. The Risk Framework incorporates the following components:

Lines of Defense

M&T employs the “three lines of defense” model, which is the core of the Risk Framework and provides the structure to clarify roles, responsibilities and accountabilities, including the establishment of the independent Risk Management, Credit Review and Internal Audit functions. Each line of defense plays a critical role in the effective identification, assessment, monitoring, mitigation, communication and escalation of risks. Front-line business and operational support areas participate in the delivery of products or services to customers, as well as related servicing and technology. As the first line of defense, they are the ultimate owners of risk and are responsible for aligning their respective business strategies with the risk appetite established by M&T. These units ensure that key risks within their areas are identified, assessed, monitored and mitigated through an effective system of internal controls. They are also responsible for establishing business line policies, procedures, and limits, in accordance with the RAS, and monitor performance against those limits to ensure they operate within the boundaries of their risk-taking authority. The second line of defense consists of the independent Risk division and provides independent challenge and oversight of the identification, assessment, monitoring, mitigation and reporting of significant risks and risk practices within the first line of defense and throughout the Company. The second line of defense establishes the enterprise-wide risk management policies, procedures, methodologies and tools, including the risk governance framework and communicates those throughout the Company, and oversees the establishment of risk limits and monitors compliance with those limits, in accordance with the risk appetite. Credit Review, which reports to the Risk Committee of the Board of Directors, is independent from the first and second lines of defense. They provide independent oversight of the safety and soundness of M&T’s credit portfolio. Internal Audit, which reports to the Audit Committee of the Board of Directors, is independent from the first and second lines of defense. They provide assurance to senior and executive management and the Board of Directors, via the Audit Committee of the Board, of the effectiveness of risk management programs, policies, processes, practices, and controls, as well as adherence to regulatory guidance.

Risk Appetite

M&T’s risk appetite represents the aggregate amount of risk the Company is willing to assume, to achieve its strategic business objectives. In establishing its risk appetite, M&T takes into consideration asset size, the complexity of operations, business objectives, organizational structure as well as its purpose and values, risk philosophy, and capacity to bear risk. The RAS outlines the principles describing the risk the Company is willing to take and associated objectives. The RAS and supporting measurements and constraints inform and guide risk-related decision making with linkage to the M&T’s core processes.

Qualitative and quantitative risk metrics monitor emerging risks and provide specific measures that are used to monitor risk-taking relative to the Company's risk appetite.

Committee Roles and Responsibilities

M&T's integrated risk governance structure begins with oversight by members of the Board of Directors through the Risk Committee of the Board of Directors. Senior management oversight of the Risk Framework is provided through a risk governance structure that includes the Management Risk Committee, which oversees eight Risk Governance Committees that monitor specific risks applicable to the Company's businesses.

Internal Capital Adequacy Process

M&T's CAP is the established documented approach through which the Company assesses its capital requirements in relation to the material risks facing the organization, leveraging the efforts of the Risk Framework. The CAP is intended to ensure that M&T holds sufficient capital relative to its risk profile to support its business activities under a range of conditions, including adverse economic environments.

The Company's assessment of capital adequacy incorporates enterprise-wide capital stress testing that evaluate potential post-stress capital requirements in relation to available capital resources, considering the comprehensive inventory of key vulnerabilities and scenarios identified through the aforementioned risk identification process. This approach considers key risks and vulnerabilities when assessing the capital needs stemming from potential exposures; whether on or off-balance sheet. The CAP also incorporates explicit capital adequacy thresholds and limits with respect to the Company's established risk appetite.

As a sub-committee of M&T's Executive Asset-Liability Liquidity Capital Committee, the CMC is the primary management body responsible for regular oversight of the Company's capital position and outlook and for communicating with other members of executive leadership and the Board of Directors regarding matters related to capital. The CMC proactively monitors M&T's prospective capital generation and capital requirements, as well as potential material risks facing the Company, leveraging the Company's risk management infrastructure. M&T's Risk Committee of the Board of Directors is responsible for establishment of capital goals reflecting the organization's risk appetite and verifying that the Company's capital position considers material risks and is appropriate for its risk profile.

Regulatory Capital Ratios

M&T and its subsidiary banks are required to comply with applicable Capital Rules. The Capital Rules include both risk-based requirements, which compare three measures of capital to RWA, as well as leverage requirements, which, in the case of Category IV BHCs such as M&T, consist of the Tier 1 leverage ratio described below.

Pursuant to the Capital Rules, the minimum capital ratios are as follows:

- 4.5% CET1 capital to RWA (each as defined in the Capital Rules);
- 6.0% Tier 1 capital (CET1 capital plus additional Tier 1 capital) to RWA (each as defined in the Capital Rules);

- 8.0% Total capital (Tier 1 capital plus Tier 2 capital) to RWA (each as defined in the Capital Rules); and
- 4.0% Tier 1 capital to average consolidated assets (known as the "leverage ratio"), as defined in the Capital Rules

Capital Rules require buffers in addition to the minimum risk-based capital ratios noted above. M&T is subject to a SCB requirement that is determined through the Federal Reserve’s supervisory stress tests and M&T’s bank subsidiaries are subject to a 2.5% capital conservation buffer requirement. The buffer must be composed entirely of CET1 capital. At June 30, 2025 M&T's SCB was 3.8%. In June 2025, the Federal Reserve released the results of its most recent supervisory stress tests, in which M&T elected to participate. Based on those results, M&T's SCB is estimated to be 2.7% effective October 1, 2025. Accordingly, M&T is currently subject to a CET1 capital requirement of 8.3% (a sum of the SCB and the minimum CET1 capital ratio). M&T’s regulatory capital ratios exceeded the minimum capital ratios and the additional SCB.

The capital conservation buffer of a banking organization is calculated as the lowest of the following three ratios: the CET1 capital ratio less its minimum CET1 capital ratio; the Tier 1 capital ratio less its minimum Tier 1 capital ratio or the total capital ratio less its minimum total capital ratio. M&T's lowest of the three capital ratio differences was the total capital ratio, which was 5.96% over the minimum total capital ratio. The Company does not have any limitations on distributions and discretionary bonus payments resulting from the capital buffer requirements. As of June 30, 2025, M&T had eligible retained income of \$676 million.

As described in Part I, Item 1 of M&T's Form 10-K, on July 27, 2023, the federal banking agencies issued a notice of proposed rulemaking to modify the regulatory capital requirements applicable to large banking organizations with total assets exceeding \$100 billion, like the Company. Management continues to evaluate the impact of the proposed rules on the regulatory capital requirements of M&T and its subsidiary banks. At June 30, 2025, the inclusion of accumulated other comprehensive income components related to investment securities available for sale and defined benefit plan liability adjustments would have increased the Company's CET1 capital ratio by 10 basis points.

A more detailed discussion of regulatory capital requirements is included in Part I, Item 1 of M&T’s Form 10-K under the headings “Capital Requirements” and “Limits on Undercapitalized Depository Institutions.”

Table 1 provides the regulatory capital ratios of M&T, M&T Bank and Wilmington Trust, N.A. as of June 30, 2025:

Table 1

REGULATORY CAPITAL RATIOS

June 30, 2025

(Dollars in millions)	M&T (Consolidated)	M&T Bank	Wilmington Trust, N.A.
CET1 capital	10.99%	12.46%	281.66%
Tier 1 capital	12.50	12.46	281.66
Total capital	13.96	13.84	281.95
Tier 1 leverage	9.81	9.76	87.44
RWA	\$ 158,229	\$ 157,661	\$ 225

The following table presents M&T's CET1 capital, Tier 1 capital, Tier 2 capital, and Total capital for the period ended June 30, 2025.

Table 2

CAPITAL STRUCTURE

(In millions)	June 30, 2025
CET1 capital:	
Common stock plus related surplus	\$ 6,046
Retained earnings	19,870
Accumulated Other Comprehensive Income (Loss)	215
CET1 capital before adjustments and deductions	26,131
CET1 capital: adjustments and deductions	
Less: Goodwill and other intangibles, net of related taxes	8,524
Net unrealized gains (losses) on available-for-sale debt securities, net of deferred taxes	61
Accumulated net gains (losses) on cash flow hedges, net of deferred taxes	63
Accumulated Other Comprehensive income (loss) attributed to pension and postretirement benefit costs, net of deferred taxes	95
CET1 capital	17,388
Additional Tier 1 capital elements	2,394
Tier 1 capital	19,782
Tier 2 capital instruments plus related surplus	331
Adjusted allowances for credit losses	1,981
Tier 2 capital	2,312
Total capital	\$ 22,094

Pursuant to the Capital Rules, non-advanced approaches banking organizations, including M&T, could make a one-time permanent election to exclude the effects of certain accumulated other comprehensive income or loss items reflected in shareholders' equity under GAAP. M&T made that election during the first quarter of 2015.

In compliance with the Capital Rules, the Company reviewed the aggregate amount of surplus capital of insurance subsidiaries included in the regulatory capital of the consolidated group and has determined that it was not material.

For further information on capital, refer to Form 10-K in Part I, Item 1, under the headings "Enhanced Prudential Standards", "Capital Requirements" and "Stress Testing and SCB," Part II, Item 7, under the heading "Capital" and notes 9 and 22 of Notes to Financial Statements in Part II, Item 8. and Form 10-Q Part 1, Item 2 under the heading "Capital."

RWA

The Capital Rules also address asset risk weights that affect the denominator in banking institutions' regulatory risk-based capital ratios. M&T must assign risk weights to the Company's assets and off-balance sheet items. M&T has an ongoing process to review data elements associated with these exposures that from time to time may affect how specific exposures are classified and could lead to increases or decreases of the regulatory risk weights assigned to such exposures. Under the Capital Rules, M&T is subject to the standardized approach for determination of RWA. Table 3 summarizes the Company's standardized RWA by certain categories, as defined in the Capital Rules.

Table 3

RWA

June 30, 2025
(In millions)

	M&T (Consolidated)
Exposures to sovereign entities	\$ 4,692
Exposures to depository institutions, foreign banks and credit unions	704
Exposures to public sector entities	1,301
Corporate and other exposures	120,626
Residential mortgage exposures	17,282
Statutory multifamily mortgages and pre-sold construction loans	1,218
HVCRE loans	172
Past due loans and leases	1,834
Other assets	8,151
Cleared transactions	—
Securitization exposures	280
Equity exposures	2,219
Total RWA before excess adjusted allowances for credit losses	158,479
Less: Excess adjusted allowances for credit losses	250
Total RWA (a)	<u>\$ 158,229</u>

(a) M&T does not have any exposures to supranational entities and multilateral development banks, default fund contributions, unsettled transactions or market risk.

Credit Risk General Disclosures

The Company employs a long-term strategy and credit risk philosophy that focuses on stable, proven and conservative underwriting criteria and active portfolio monitoring which is consistent with the Company's risk appetite. The process integrates transparent qualitative and quantitative factors in the decision-making process with credit scorecards and models to create a robust underwriting and risk management framework. Past due loan status is measured based on the number of days that contractually required principal or interest payments are delinquent.

Commercial Exposures

- The Company utilizes a committee approval structure for large commercial relationships.
- Approval decisions are not solely made centrally but are supplemented by regional committees that enhance centrally assembled corporate best practices with in-market expertise. Using a mix of centralized and regional committees, the Company is able to retain credit consistency while applying geographic expertise.
- A centralized underwriting function provides for consistent application of underwriting standards, including debt service and loan-to-value ratios, and independence from the business line.
- The Company's risk rating consists of two measurements, a Probability of Default and a Loss Given Default. These measurements, which incorporate expectations for default and give consideration to collateral types and values, are used to differentiate risk within the portfolio and consider the expectation of default for each loan.

Once approved, loans are subject to a granular approach by portfolio management which assists in the early identification of asset quality issues.

- Extensive monthly and quarterly reporting for Executive Management and the Board of Directors.
 - Includes metrics such as portfolio size, industry concentrations, property type, delinquency, non-performing, charge-offs and risk rating distributions.
- Commercial Credit Quality Assurance team is responsible to ensure basic safety and soundness of the commercial and industrial loan and commercial real estate loan portfolios. The team's primary focus is the continuous monitoring, analysis, and general oversight of the commercial criticized asset portfolios to ensure these loans are properly risk-rated with appropriate accrual designation and timely recognition of charge-offs.

Consumer and Residential Real Estate Exposures

- Residential real estate loans are generally underwritten according to the standards set by the secondary markets, including Fannie Mae and Freddie Mac.
- Consumer loan underwriting decisions are primarily based on Credit Score (FICO), Debt-to-Income, Revolving Debt-to-Income, Combined Loan-to-Value, Lien Position (Home Equity) and, when appropriate, Internal Custom Scorecards.
- The performance of the residential real estate loan and consumer loan portfolios is monitored very closely through a combination of reporting, feedback from the Customer Asset Management (collections) area, and management oversight. Reporting is varied and extensive, with reports being produced monthly or quarterly, including monthly dashboard reports that provide product performance metrics.

Further discussion of the credit quality of the loan portfolios is provided in M&T's Form 10-K and Form 10-Q, as referenced in Appendix A.

The credit concentration limits have been established to minimize the potential impact of losses resulting from excessive concentrations of credit in certain sectors, product-types and geographical locations. Concentration limits are evaluated annually on a number of measures defined by the Credit Risk Committee including Tier 1 capital plus allowance for loan and lease losses, stressed capital, concentration relative to total commercial loans, and implied growth rate. The Company takes a dynamic and balanced view to manage, mitigate and maintain a well-diversified credit risk profile in its lending and investing activities. Additional disclosures related to the Company's credit exposures and credit risk policies are included in the Company's Form 10-K.

Table 4 provides the geographic distribution by major types of credit exposures that includes loans and leases, net of unearned discount, and contractual commitments to extend credit and letters of credit. For further information on the Company's commitments to extend credit and letters of credit, Appendix A provides references to M&T's Form 10-K, Form 10-Q and FR Y-9C.

Table 4

LOANS AND LEASES

June 30, 2025

	Outstandings	Unused Commitments(a)	Total	Percent of Total			
				New York	Mid-Atlantic (b)	New England (c)	Other
(Dollars in millions)							
Real estate:							
Residential	\$ 24,117	\$ 671	\$ 24,788	29 %	31 %	27 %	13 %
Commercial	24,567	2,663	27,230	35	28	21	16
Total real estate	48,684	3,334	52,018	32 %	29 %	24 %	15 %
Commercial and industrial	58,937	35,886	94,823	25 %	33 %	15 %	27 %
Consumer:							
Recreational finance	13,666		13,666	8 %	14 %	6 %	72 %
Home equity lines and loans	4,634	7,927	12,561	32	41	25	2
Automobile	5,260	—	5,260	24	47	8	21
Other secured or guaranteed	708	—	708	30	31	11	28
Other unsecured	1,504	4,774	6,278	36	53	9	2
Total consumer	25,772	12,701	38,473	23 %	34 %	13 %	30 %
Total loans	133,393	51,921	185,314	26 %	32 %	17 %	25 %
Commercial leases	2,723	—	2,723	21 %	23 %	9 %	47 %
Total loans and leases	\$ 136,116	\$ 51,921	\$ 188,037	26 %	32 %	17 %	25 %
Letters of credit	\$ —	\$ 2,345	\$ 2,345	41 %	47 %	11 %	1 %

(a) Includes contractual commitments to extend credit and letters of credit.

(b) Includes Delaware, Maryland, New Jersey, Pennsylvania, Virginia, West Virginia and the District of Columbia.

(c) Includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.

Table 5 presents the geographic distribution for the Company's state and municipal securities.

Table 5

STATE AND MUNICIPAL SECURITIES EXPOSURES

June 30, 2025

(In millions)

Region	Exposure Amount	Percentage of Total
New York	\$ 80	4 %
Mid-Atlantic (a)	194	9 %
New England (b)	370	17 %
Other		
California	263	12 %
Texas	166	7 %
Florida	127	6 %
Minnesota	125	5 %
Washington	120	5 %
All other states	781	35 %
Total state and municipal securities at amortized cost	\$ 2,226	100 %

(a) Includes Delaware, Maryland, New Jersey, Pennsylvania, Virginia, West Virginia and the District of Columbia.

(b) Includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.

Table 6 presents the Company's remaining contractual maturities by credit exposure category.

Table 6

REMAINING CONTRACTUAL MATURITIES BY CREDIT EXPOSURE

June 30, 2025

(In millions)

	One year or less	One year through five years	Over five years	Total
Loans and leases (a)	\$ 29,158	\$ 51,327	\$ 54,058	\$ 134,543
Unfunded commitments(b)	25,976	27,387	7,108	60,471
Investment securities available for sale(c)	3,283	9,365	8,892	21,540
Investment securities held to maturity(d)	492	2,653	9,879	13,024
Total	\$ 58,909	\$ 90,732	\$ 79,937	\$ 229,578

(a) Amounts do not include nonaccrual loans of approximately \$1.6 billion

(b) Unfunded commitments include commitments to extend credit, letters of credit, financial guarantees and indemnification contracts, and commitments to sell real estate

(c) Investment securities available for sale are presented at estimated fair value.

(d) Investment securities held to maturity are presented at amortized cost.

GAAP requires an allowance for credit losses to be deducted from the amortized cost basis of financial assets to present the net carrying value that is expected to be collected over the contractual term of the assets considering relevant information about past events, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. Management determines the allowance for credit losses based on the relative risk characteristics of the loan portfolio. Refer to Form 10-K and 10-Q under the heading “Provision for Credit Losses” section of MD&A of Financial Condition and Results of Operations and note 4 of Notes to Financial Statements in Part II, Item 8 of Form 10-K and note 4 of Notes to Financial Statements in Form 10-Q for further discussion of the evaluation of the allowance for credit losses.

Table 7 provides information regarding past due and nonaccrual loans by geography and major type of credit exposure.

Table 7

PAST DUE AND NONACCRUAL LOANS BY GEOGRAPHY

June 30, 2025

(In millions)

	Past due accruing loans		Nonaccrual loans - amortized cost

Total	\$ 1,368	\$ 496	\$ 1,573	\$ 1,152	\$ 421

(a) Includes Delaware, Maryland, New Jersey, Pennsylvania, Virginia, West Virginia and the District of Columbia.

(b) Includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.

Counterparty Credit Risk

Outside of core lending activities, counterparty risk at M&T arises primarily from derivatives transactions with outside firms and customers. The Company enters into derivative transactions to hedge the fair value of certain fixed rate borrowings and the interest cash flows related to certain variable rate loans. The Company also engages into non-hedging derivative transactions to meet the financial needs of customers who require interest rate swap or foreign exchange services. The Company generally mitigates the foreign exchange and interest rate risk associated with those customer activities by entering into offsetting positions with third parties. The types and amounts of these activities are subject to a well-defined series of potential loss exposure limits established by management and approved by M&T's Board of Directors. M&T maintains policies, controls and processes to manage its mark-to-market settlement and over-collateralization risks in conjunction with its entering into derivative transactions with third parties.

The Counterparty Risk Management group is responsible for a variety of risk management activities to oversee counterparty credit risk which include:

- Monitoring daily material changes in market-related metrics (stock price, public credit ratings and available credit default swap rates) of obligors.
- Daily monitoring of counterparty exposures by product.
- Monitoring compliance with Regulation F (restricts exposure to banks that are inadequately capitalized).
- Assigning internal risk ratings to each counterparty at relationship initiation and reassessing during annual or more frequent reviews.
- Reviewing all impaired securities (both individually and by investment category) regularly.
- Monitoring regularly the length of time that individual securities have been market-impaired (that is, where fair value is less than amortized cost).

In addition, the Company sets trading limits for credit facilities that it extends to qualified trading counterparties based upon an approved and validated methodology.

The Company's gross positive fair value of OTC derivative contracts and collateral held are presented in Table 8.

Table 8

OTC DERIVATIVES

June 30, 2025
(In millions)

	Current Credit Exposure	Potential Future Exposure	Total Exposure
OTC Derivatives:			
Interest rate contracts	\$ 231	\$ 70	\$ 301
Foreign exchange and other option and futures contracts	27	10	37
Total OTC derivative current credit exposure	258	80	338
Collateral held:			
Cash	(59)	—	(59)
Government securities	(17)	—	(17)
Total collateral held	(76)	—	(76)
Net OTC derivatives	\$ 182	\$ 80	\$ 262

Credit Risk Mitigation

The Company utilizes a loan grading system which is applied to all commercial and industrial loans and commercial real estate loans. Loans with an elevated level of credit risk are classified as “criticized” and are subjected to additional scrutiny and review by credit risk personnel. The timing and extent of potential losses, considering collateral valuation and other factors, and the Company’s potential courses of action are regularly reviewed. Because collateral is a fundamental mitigant for credit risk, to the extent that loans are collateral-dependent, they oftentimes are evaluated based on the fair value of the loan’s collateral as estimated at or near the financial statement date. The main types of collateral taken by the Company include real estate, cash, depreciable assets, accounts receivable, inventory and other business-related assets. Residential real estate loans and consumer loans are generally evaluated collectively after considering such factors as payment performance and recent loss experience and trends, which are mainly driven by current collateral values in the marketplace as well as the amount of loan defaults. Refer to Part II, Item 7 of Form 10-K and Part 1, Item 2 of Form 10-Q under the heading “Provision for Credit Losses” for further discussion on loan collateral, geographic distribution of loans and credit risk mitigation activities.

M&T utilizes legal agreements (primarily master netting agreements) that are established with counterparties to help reduce counterparty risk. Within a master netting agreement can be a Credit Support Annex, which establishes collateral posting rules for the counterparties to cover exposure in the agreement. A Credit Support Annex typically contains a few standard themes:

- Frequency of when collateral calls are made (typically daily).
- The minimum amount posted for new collateral calls (referred to as a minimum transfer amount).
- The type of collateral generally accepted by the Company which includes cash, U.S. Treasury securities and U.S. Agency securities. Other types of securities may be accepted, but only after consultation with Risk Management.

M&T's Legal department reviews all counterparty derivative agreements before execution.

In addition, the Company clears certain derivative transactions through a clearinghouse, rather than directly with counterparties. Those transactions cleared through a clearinghouse require initial margin collateral and variation margin payments depending on the contracts being in a net asset or liability position. The amount of initial margin collateral posted by the Company was \$247 million at June 30, 2025. The fair value asset and liability amounts of derivative contracts have been reduced by variation margin payments treated as settlements of those positions. Variation margin on derivative contracts not treated as settlements continues to represent collateral posted or received by the Company.

Securities purchased under agreements to resell and securities sold under agreements to repurchase (collectively known as repurchase agreements) are treated as collateralized financing transactions and are recorded at amounts equal to the cash or other consideration exchanged. These repurchase agreements are largely with bank or broker counterparties who also engage in derivatives trading with the Company. It is generally the Company's policy to take possession of collateral pledged to secure agreements to resell to mitigate any credit risk associated with the transaction.

The Company does not hedge credit risk associated with lending, repurchase agreements or derivatives transactions beyond collateral requirements. Based on adherence to the Company's credit standards and the presence of the netting and collateral provisions, including any necessary haircuts, the Company believes that the credit risk inherent in repurchase agreement derivative contracts was not material.

For each separately disclosed portfolio, Table 9 presents the total exposure that is covered by guarantees and the RWA amount associated with that exposure.

Table 9

GUARANTEES

June 30, 2025
(In millions)

Exposure Type	Guarantor	Exposure amount	RWA
Investment securities held to maturity	U.S. Treasury	\$ 443	\$ —

Market Risk

Subpart F of Regulation Q (the MRR) establishes risk-based capital requirements for Federal Reserve Board-regulated institutions with significant exposure to market risk, provides methods for these institutions to calculate their standardized measure for market risk and establishes public disclosure requirements. The MRR applies to each banking organization that has gross trading assets and liabilities equal to \$1 billion or more, or gross trading assets and liabilities equal to 10 percent or more of total consolidated assets as reported in the most recent quarterly Call Report or FR Y-9C Report. M&T reported \$93 million of gross trading assets and liabilities as of June 30, 2025. As M&T is below the MRR reportable thresholds, related disclosures and RWA calculations are not applicable. More detailed discussions of market risk and other risks associated with trading activities are included in Form 10-K under the heading "Taxable-equivalent Net Interest Income" section of MD&A of Financial Condition and Results of Operations and note 17 of Notes to Financial Statements under the heading "Derivative financial instruments" and Form 10-Q under the heading "Taxable equivalent Net Interest Income" section of MD&A of Financial Condition and Results of Operations and note 11 of Notes to Financial Statements under the heading "Derivative financial instruments."

Securitization Exposures

The Basel III securitization framework applies to on- and off-balance sheet credit exposures that arise from a securitization transaction. The Basel III rules define a securitization exposure as:

- All or a portion of the credit risk of one or more underlying exposures is transferred to one or more third parties;
- The credit risk associated with the underlying exposures has been separated into at least two tranches reflecting different levels of seniority;
- Performance of the securitization depends on the performance of the underlying exposures; and
- The underlying exposures are financial in nature and are not owned by an operating company, a Small Business Investment Company or related to a community development investment.

M&T's securitization activity has consisted of securitizing loans originated for sale into government-issued or guaranteed mortgage-backed securities. M&T also holds certain private mortgage-backed securities and extends certain loan facilities to structures that exhibit securitization-type exposure. M&T has not recognized any material losses as a result of having securitized assets. Additionally, M&T Bank and its subsidiaries have issued asset-backed notes secured by either equipment finance loans and leases or by automobile loans. Those loans and leases were sold into special purpose trusts which in turn issued asset-backed notes to investors. The loans and leases continue to be serviced by the Company. The senior-most notes in those securitizations were purchased by third parties whereas the residual interests of the trusts were retained by M&T. As a result of the retention of the residual interests and its continued role as servicer of the loans and leases, M&T is considered to be the primary beneficiary of the securitization trusts and, accordingly, the trusts have been included in M&T's consolidated financial statements. M&T holds capital for the entire portion of the underlying exposures related to our equipment finance and auto securitizations and do not consider them securitization exposures for regulatory capital purposes as a result of consolidating the underlying exposures. Refer to note 1 and note 18 of Notes to Financial Statements in Part II, Item 8 of Form 10-K and note 12 of Notes to Financial Statements in Form 10-Q for additional information on securitizations and variable interest entities. M&T has securitization and re-securitization exposures in the form of mortgage-backed securities in its held-to-maturity portfolio and a structured commercial loan securitization exposure in its held-for-investment loan and lease portfolio. M&T does not apply credit risk mitigation to its securitization exposures and does not have any synthetic securitization exposures.

In accordance with the Capital Rules, M&T utilizes the SSFA to determine RWA for certain of securitization exposures that meet operational requirements and applies a 1,250 percent risk-weight to those securitization exposures to which SSFA cannot be applied.

Table 11 presents M&T's securitization exposures and associated capital treatment.

Table 11

SECURITIZATION EXPOSURES

June 30, 2025

(In millions)

	<u>Exposure Amount</u>	<u>SSFA RWA</u>	<u>Capital Impact of RWA(c)</u>
Exposure type:			
Collateralized mortgage obligations	\$ 34	\$ 187	\$ 15
Loans	277	93	7
Other (a)	—	—	—
Total securitization exposure (b)	<u>\$ 311</u>	<u>\$ 280</u>	<u>\$ 22</u>

(a) Exposure amount, SSFA RWA and capital impact of RWA round to less than \$1 million.

(b) M&T did not have off-balance sheet securitization exposures at June 30, 2025.

(c) The capital impact of RWA is calculated by multiplying RWA by the minimum total capital ratio of 8%.

Table 12 presents securitizations by risk-weight bands and capital treatment:

Table 12

SECURITIZATION EXPOSURES BY RISK-WEIGHTING (a)

June 30, 2025
(In millions)

Securitization	Exposure Amount	SSFA RWA	Capital Impact of RWA(b)
Zero to 250% risk-weighting	\$ 280	\$ 95	\$ 7
251% to 500% risk-weighting	—	—	—
501% to 1250% risk-weighting	31	185	15
Total securitization exposure	\$ 311	\$ 280	\$ 22

(a) Includes total re-securitization exposures of \$34 million with a risk-weight amount and capital impact of \$186 million and \$15 million, respectively.

(b) The capital impact of RWA is calculated by multiplying RWA by the minimum total capital ratio of 8%.

Equities Not Subject to MRR

Management of M&T's investment activities generally resides within the Company's Treasury Division. The Treasury Investment Policy, approved by M&T's Board of Directors, aligns with M&T's RAS and outlines the governance framework, operational guidelines, decision-making process, and investment criteria for all discretionary investment securities of the Company.

The Company had total equity exposures of approximately \$3.8 billion at June 30, 2025 that consisted predominantly of:

- Bank owned life insurance and corporate owned life insurance separate accounts (\$829 million);
- Tax-advantaged investments (\$1.7 billion) consisting largely of investments in qualified affordable housing projects and facilities that produce renewable energy;
- Stock of the Federal Reserve Bank of New York (\$584 million) and the Federal Home Loan Bank of New York (\$146 million);
- Investment related to unfunded nonqualified supplemental plans (\$93 million) established to provide retirement benefits to certain senior officers;
- Investments in mutual funds (\$270 million).

The Company uses the simple risk-weight approach for its individual equity securities, the alternative modified look-through approach for bank owned life insurance assets held in separate accounts and the full look-through approach for investments in mutual funds. These assets are reviewed for creditworthiness and evaluated regularly for impairment.

Nonpublic equities are generally recorded either at cost or using the equity method. Details of the Company's accounting policies for investment securities and the valuation of financial instruments are provided in note 1 of Notes to Financial Statements in Part II, Item 8 of Form 10-K.

Equity investments with readily determinable fair values are measured at fair value with changes in fair value recognized in the consolidated statement of income. Net unrealized gains and losses on such equity securities were not significant during the second quarter of 2025.

Equities in mutual funds maintained in the trading account are reported at fair value. Changes in fair value are recorded in trading account and non-hedging derivative gains in the Company's consolidated statement of income.

Table 13 summarizes the Company's equities not subject to the MRR

Table 13

EQUITIES NOT SUBJECT TO MRR

June 30, 2025

(In millions)

	Nonpublic	Public	Total
Fair value	\$ 3,386	\$ 367	\$ 3,753
Latent revaluation gains (losses)(a)	—	—	—
Fair value	<u>\$ 3,386</u>	<u>\$ 367</u>	<u>\$ 3,753</u>

(a) Management believes that any latent revaluation gains or losses that may exist are not material.

The RWA and associated capital requirements for equities not subject to the MRR follow.

	Exposure Amount	RWA	Capital Impact of RWA(a)
Not subject to risk-weight	\$ —	\$ —	\$ —
0%	584	—	—
20%	146	29	2
100%	1,832	1,831	147
Full look-through approach	367	111	9
Alternative modified look-through approach	824	248	20
Total capital requirements for equity securities	<u>\$ 3,753</u>	<u>\$ 2,219</u>	<u>\$ 178</u>

(a) The capital impact of RWA is calculated by multiplying RWA by the minimum total capital ratio of 8%.

Interest Rate Risk for Non-Trading Activities

Interest Rate Risk for Non-Trading Activities Disclosure is presented in Form 10-K Part II, Item 7, included under the heading "Market Risk and Interest Rate Sensitivity."

Forward-Looking Statements

This document and MD&A of Financial Condition and Results of Operations and other sections within Form 10-K contain forward-looking statements regarding the Company within the meaning of the Private Securities Litigation Reform Act of 1995 and the rules and regulations of the SEC. Any statement that does not describe historical or current facts is a forward-looking statement, including statements based on current expectations, estimates and projections about the Company's business, and management's beliefs and assumptions.

Statements regarding the potential effects of events or factors specific to the Company and/or the financial industry as a whole, as well as national and global events generally, on the Company's business, financial condition, liquidity and results of operations may constitute forward-looking statements. Such statements are subject to the risk that the actual effects may differ, possibly materially, from what is reflected in those forward-looking statements due to factors and future developments that are uncertain, unpredictable and in many cases beyond the Company's control.

Forward-looking statements are typically identified by words such as "believe," "expect," "anticipate," "intend," "target," "estimate," "continue," or "potential," by future conditional verbs such as "will," "would," "should," "could," or "may," or by variations of such words or by similar expressions. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions which are difficult to predict and may cause actual outcomes to differ materially from what is expressed or forecasted.

While there can be no assurance that any list of risks and uncertainties is complete, important factors that could cause actual outcomes and results to differ materially from those contemplated by forward-looking statements include the following, without limitation: economic conditions and growth rates, including inflation and market volatility; events and developments in the financial services industry, including industry conditions; changes in interest rates, spreads on earning assets and interest-bearing liabilities, and interest rate sensitivity; prepayment speeds, loan originations, loan concentrations by type and industry, credit losses and market values on loans, collateral securing loans, and other assets; sources of liquidity; levels of client deposits; ability to contain costs and expenses; changes in the Company's credit ratings; domestic or international political developments and other geopolitical events, including trade and tariff policies and international conflicts and hostilities; changes and trends in the securities markets; common shares outstanding and common stock price volatility; fair value of and number of stock-based compensation awards to be issued in future periods; the impact of changes in market values on trust-related revenues; federal, state or local legislation and/or regulations affecting the financial services industry, or M&T and its subsidiaries individually or collectively, including tax policy; regulatory supervision and oversight, including monetary policy and capital requirements; governmental and public policy changes; political conditions, either nationally or in the states in which M&T and its subsidiaries do business; the outcome of pending and future litigation and governmental proceedings, including tax-related examinations and other matters; changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board, regulatory agencies or legislation; increasing price, product and service competition by competitors, including new entrants; technological developments and changes; the ability to continue to introduce competitive new products and services on a timely, cost-effective basis; the mix of products and services; protection and validity of intellectual property rights; reliance on large customers; technological, implementation and cost/financial risks in large, multi-year contracts; continued availability of financing; financial resources in the amounts, at the times and on the terms required to support M&T and its subsidiaries' future businesses; and material differences in the actual financial results of merger, acquisition, divestment and investment activities compared with M&T's initial expectations, including the full realization of anticipated cost savings and revenue enhancements.

These are representative of the factors that could affect the outcome of the forward-looking statements. In addition, as noted, such statements could be affected by general industry and market conditions and growth rates, general economic and political conditions, either nationally or in the states in which the Company does business, and other factors.

M&T provides further detail regarding these risks and uncertainties in its Form 10-K for the year ended December 31, 2024 and Form 10-Q for the quarter ended June 30, 2025 including in the Risk Factors section of such report, as well as in other SEC filings.

Forward-looking statements speak only as of the date they are made, and the Company assumes no duty and does not undertake to update forward-looking statements.

M&T Bank Corporation
Pillar 3 Regulatory Capital Disclosure Cross-reference Sheet
For the Quarter Ended June 30, 2025

In compliance with the Pillar 3 Regulatory Capital Disclosure Requirements, M&T has provided the following summary of the required disclosure locations. All documents referenced except Form 10-K for the year ended December 31, 2024, are as of and for the quarter ended June 30, 2025.

Table	Disclosure Requirement	Disclosure Location
Scope of Application		
Qualitative: (a)	The name of the top corporate entity in the group to which the Risk-Based Capital Standards (subpart D) apply.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Overview
(b)	A brief description of the differences in the basis for consolidating entities for accounting and regulatory purposes, with a description of those entities: (1) That are fully consolidated; (2) That are deconsolidated and deducted from total capital; (3) For which the total capital requirement is deducted; and (4) That are neither consolidated nor deducted (for example, where the investment in the entity is assigned a risk weight in accordance with this subpart).	Not applicable. M&T does not have differences in the basis of consolidation for accounting and regulatory purposes.
(c)	Any restrictions, or other major impediments, on transfer of funds or regulatory capital within the group.	Form 10-K: •Part 1-Capital Requirements (Unaudited) •Part 1-Distributions (Unaudited) •Part 1-Transactions with Affiliates (Unaudited) •Note 22-Regulatory matters (Audited)
Quantitative: (d)	The aggregate amount of surplus capital of insurance subsidiaries included in the regulatory capital of the consolidated group.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Regulatory Capital Ratios
(e)	The aggregate amount by which actual regulatory capital is less than the minimum regulatory capital requirement in all subsidiaries with regulatory capital requirements and the name(s) of the subsidiaries with such deficiencies.	Not applicable. Actual total capital exceeds the minimum total capital requirements.
Capital Structure		
Qualitative: (a)	Summary information on the terms and conditions of the main features of all regulatory capital instruments.	Form 10-K: •Part 1-Capital Requirements (Unaudited) •MD&A-Capital (Unaudited) •Note 8-Borrowings (Audited) •Note 9-Shareholders' equity (Audited)
Quantitative: (b)	The amount of CET1 capital, with separate disclosure of: (1) Common stock and related surplus; (2) Retained earnings; (3) Common equity minority interest; (4) Accumulated other comprehensive income (loss); and (5) Regulatory adjustments and deductions made to CET1 capital.	FR Y-9C (Unaudited): •Schedule HC-R-Regulatory Capital Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table 2-Capital Structure
(c)	The amount of tier 1 capital, with separate disclosure of: (1) Additional tier 1 capital elements, including additional tier 1 capital instruments and tier 1 minority interest not included in CET1 capital; and (2) Regulatory adjustments and deductions made to tier 1 capital.	FR Y-9C (Unaudited): •Schedule HC-R-Regulatory Capital Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table 2-Capital Structure
(d)	The amount of total capital, with separate disclosure of: (1) Tier 2 capital elements, including tier 2 capital instruments and total capital minority interest not included in tier 1 capital; and (2) Regulatory adjustments and deductions made to total capital.	FR Y-9C (Unaudited): •Schedule HC-R-Regulatory Capital Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table 2-Capital Structure

Table	Disclosure Requirement	Disclosure Location
Capital Adequacy		
Qualitative: (a)	A summary discussion of the bank holding company's approach to assessing the adequacy of its capital to support current and future activities. General Disclosure for Counterparty Credit Risk-Related Exposures		
Qualitative: (a)	The general qualitative disclosure requirement with respect to OTC derivatives, eligible margin loans, and repo-style transactions, including a discussion of: (1) The methodology used to assign credit limits for counterparty credit exposures; (2) Policies for securing collateral, valuing and managing collateral and establishing credit reserves; (3) The primary types of collateral taken; and (4) The impact of the amount of collateral the bank holding company would have to provide given a deterioration in the bank holding company's own creditworthiness.	<p>Form 10-K (Audited):</p> <ul style="list-style-type: none"> •Note 1-Significant accounting policies •Note 17-Derivative financial instruments •Note 19-Fair value measurements <p>Form 10-Q (Unaudited):</p> <ul style="list-style-type: none"> •Note 1-Significant accounting policies •Note 11-Derivative financial instruments •Note 13-Fair value measurements <p>Pillar 3 Regulatory Capital Disclosures (Unaudited):</p> <ul style="list-style-type: none"> •Counterparty Credit Risk •Credit Risk Mitigation
Quantitative (b)	Gross positive fair value of contracts, collateral held (including type, for example, cash, government securities), and net unsecured credit exposure. A bank holding company also must disclose the notional value of credit derivative hedges purchased for counterparty credit risk protection and the distribution of current credit exposure by exposure type.	<p>Form 10-K (Audited):</p> <ul style="list-style-type: none"> •Note 17-Derivative financial instruments <p>Form 10-Q (Unaudited):</p> <ul style="list-style-type: none"> •Note 11-Derivative financial instruments <p>FR Y-9C (Unaudited):</p> <ul style="list-style-type: none"> •Schedule HC-L-Derivatives and Off-Balance-Sheet Items <p>Pillar 3 Regulatory Capital Disclosures (Unaudited):</p> <ul style="list-style-type: none"> •Counterparty Credit Risk •Credit Risk Mitigation •Table 8-OTC Derivatives
(c)	Notional amount of purchased and sold credit derivatives, segregated between use for the bank holding company's own credit portfolio and in its intermediation activities, including the distribution of the credit derivative products used, categorized further by protection bought and sold within each product group.	Not applicable.

Table	Disclosure Requirement	Disclosure Location
Credit Risk Mitigation		
Qualitative: (a)	The general qualitative disclosure requirement with respect to credit risk mitigation including: (1) Policies and processes for collateral, valuation and management; (2) A description of the main types of collateral taken by the bank holding company; (3) The main types of guarantors/credit derivative counterparties and their creditworthiness; and (4) Information about (market or credit) risk concentrations with respect to credit mitigation.	Form 10-K: <ul style="list-style-type: none"> •MD&A-Provision for Credit Losses (Unaudited) •Note 1-Significant accounting policies (Audited) •Note 3-Investment securities (Audited) •Note 4-Loans and leases and allowance for credit losses (Audited) •Note 17-Derivative financial instruments (Audited) •Note 19-Fair value measurements (Audited) Form 10-Q (Unaudited): <ul style="list-style-type: none"> •MD&A-Provision for Credit Losses •Note 1-Significant accounting policies •Note 3-Investment securities •Note 4-Loans and allowance for loan losses •Note 11-Derivative financial instruments •Note 13-Fair value measurements Pillar 3 Regulatory Capital Disclosures (Unaudited): <ul style="list-style-type: none"> •Credit Risk Mitigation

Table	Disclosure Requirement	Disclosure Location
Securitization		
Qualitative: (a)	The general qualitative disclosure requirement with respect to a securitization (including synthetic securitizations), including a discussion of: (1) The bank holding company's objectives for securitizing assets, including the extent to which these activities transfer credit risk of the underlying exposures away from the bank holding company to other entities and including the type of risks assumed and retained with resecuritization activity; (2) The nature of the risks (e.g. liquidity risk) inherent in the securitized assets; (3) The roles played by the bank holding company in the securitization process and an indication of the extent of the bank holding company's involvement in each of them; (4) The processes in place to monitor changes in the credit and market risk of securitization exposures, including how those processes differ for resecuritization exposures; (5) The bank holding company's policy for mitigating the credit risk retained through securitization and resecuritization exposures; and (6) The risk-based capital approaches that the bank holding company follows for its securitization exposures including the type of securitization exposure to which each approach applies.	Form 10-K (Audited): •Note 1-Significant accounting policies •Note 18-Variable interest entities and asset securitizations Form 10-Q (Unaudited): •Note 1-Significant accounting policies •Note 12-Variable interest entities and asset securitizations Pillar 3 Regulatory Capital Disclosures (Unaudited): •Securitizations
(b)	A list of: (1) The type of securitization Special Purpose Entities that the bank holding company, as sponsor, uses to securitize third-party exposures. The bank holding company must indicate whether it has exposure to these Special Purpose Entities, either on- or off-balance sheet; and (2) Affiliated entities: (i) That the bank holding company manages or advises; and (ii) That invest either in the securitization exposures that the bank holding company has securitized or in securitization Special Purpose Entities that the bank holding company sponsors.	Form 10-K (Audited): •Note 1-Significant accounting policies •Note 18-Variable interest entities and asset securitizations Form 10-Q (Unaudited): •Note 1-Significant accounting policies •Note 12-Variable interest entities and asset securitizations Pillar 3 Regulatory Capital Disclosures (Unaudited): •Securitizations
(c)	Summary of the bank holding company's accounting policies for securitization activities, including: (1) Whether the transactions are treated as sales or financings; (2) Recognition of gain-on-sale; (3) Methods and key assumptions applied in valuing retained or purchased interests; (4) Changes in methods and key assumptions from the previous period for valuing retained interests and impact of the changes; (5) Treatment of synthetic securitizations; (6) How exposures intended to be securitized are valued and whether they are recorded under subpart D of this part; and (7) Policies for recognizing liabilities on the balance sheet for arrangements that could require the bank holding company to provide financial support for securitized assets.	Form 10-K (Audited): •Note 1-Significant accounting policies •Note 18-Variable interest entities and asset securitizations •Note 19-Fair value measurements Form 10-Q (Unaudited): •MD&A-Capital •Note 1-Significant accounting policies •Note 12-Variable interest entities and asset securitizations •Note 13-Fair value measurements Pillar 3 Regulatory Capital Disclosures (Unaudited): •Securitizations
(d)	An explanation of significant changes to any of the quantitative information since the last reporting period.	Not applicable.
Quantitative (e)	The total outstanding exposures securitized by the bank holding company in securitizations that meet the operational criteria provided in §.41 (categorized into traditional and synthetic securitizations), by exposure type, for securitizations of third-party exposures for which the bank acts only as sponsor.	Form 10-K (Audited): •Note 18-Variable interest entities and asset securitizations Form 10-Q (Unaudited): •Note 12-Variable interest entities and asset securitizations Pillar 3 Regulatory Capital Disclosures (Unaudited): •Securitizations •Table 11-Securitization Exposures
(f)	For exposures securitized by the bank holding company in securitizations that meet the operational criteria in §.41 (1) Amount of securitized assets that are impaired/past due categorized by exposure type; and (2) Losses recognized by the bank holding company during the current period categorized by exposure type.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Securitizations
(g)	The total amount of outstanding exposures intended to be securitized categorized by exposure type.	Not applicable.
(h)	Aggregate amount of: (1) On-balance sheet securitization exposures retained or purchased categorized by exposure type; and (2) Off-balance sheet securitization exposures categorized by exposure type.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table 11-Securitization Exposures

Table	Disclosure Requirement	Disclosure Location
(i)	(1) Aggregate amount of securitization exposures retained or purchased and the associated capital requirements for these exposures, categorized between securitization and resecuritization exposures, further categorized into a meaningful number of risk weight bands and by risk-based capital approach (e.g. SSFA); and (2) Exposures that have been deducted entirely from tier 1 capital, credit enhancing I/Os deducted from total capital (as described in §.42(a)(1), and other exposures deducted from total capital should be disclosed separately by exposure type.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table 11-Securitization Exposures M&T does not have any securitization exposures that have been deducted from capital.
(j)	Summary of current year's securitization activity, including the amount of exposures securitized (by exposure type), and recognized gain or loss on sale by exposure type.	Form 10-K (Audited): •Note 8-Borrowings •Note 18-Variable interest entities and asset securitizations Form 10-Q (Unaudited): •Note 11-Derivative financial instruments •Note 12-Variable interest entities and asset securitizations Pillar 3 Regulatory Capital Disclosures (Unaudited): •Securitizations
(k)	Aggregate amount of resecuritization exposures retained or purchased categorized according to: (1) Exposures to which credit risk mitigation is applied and those not applied; and (2) Exposures to guarantors categorized according to guarantor creditworthiness categories or guarantor name.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Securitizations
Equities Not Subject to MRR		
Qualitative: (a)	The general qualitative disclosure requirement with respect to equity risk for equities not subject to subpart F of this part, including: (1) Differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons; and (2) Discussion of important policies covering the valuation of and accounting for equity holdings not subject to subpart F of this part. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices.	Form 10-K (Audited): •Note 1-Significant accounting policies •Note 19-Fair value measurements •Note 23-Relationship with BLG and Bayview Financial Form 10-Q (Unaudited): •Note 1-Significant accounting policies •Note 13-Fair value measurements •Note 16-Relationship with BLG and Bayview Financial Pillar 3 Regulatory Capital Disclosures (Unaudited): •Equities Not Subject to MRR
Quantitative: (b)	Value disclosed on the balance sheet of investments, as well as the fair value of those investments; for securities that are publicly traded, a comparison to publicly-quoted share values where the share price is materially different from fair value.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Equities Not Subject to MRR
(c)	The types and nature of investments, including the amount that is: (1) Publicly traded; and (2) Nonpublicly traded.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table 13-Equities Not Subject To MRR
(d)	The cumulative realized gains (losses) arising from sales and liquidations in the reporting period.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Equities Not Subject to MRR
(e)	(1) Total unrealized gains (losses). (2) Total latent revaluation gains (losses). (3) Any amounts of the above included in tier 1 or tier 2 capital.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table 13-Equities Not Subject To MRR
(f)	Capital requirements categorized by appropriate equity groupings, consistent with the bank holding company's methodology, as well as the aggregate amounts and the type of equity investments subject to any supervisory transition regarding regulatory capital requirements.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table 13-Equities Not Subject To MRR
Interest Rate Risk for Non-trading Activities		
Qualitative: (a)	The general qualitative disclosure requirement, including the nature of interest rate risk for non-trading activities and key assumptions, including assumptions regarding loan prepayments and behavior of non-maturity deposits, and frequency of measurement of interest rate risk for non-trading activities.	Form 10-K (Unaudited): •MD&A-Liquidity Risk •MD&A-Market Risk and Interest Rate Sensitivity Pillar 3 Regulatory Capital Disclosures (Unaudited): •Interest Rate Risk for Non-Trading Activities
Quantitative: (b)	The increase (decline) in earnings or economic value (or relevant measure used by management) for upward and downward rate shocks according to management's method for measuring interest rate risk for non-trading activities, categorized by currency (as appropriate).	Form 10-K (Unaudited): •MD&A-Liquidity Risk •MD&A-Market Risk and Interest Rate Sensitivity Form 10-Q (Unaudited): •MD&A-Taxable-equivalent Net Interest Income •MD&A-Market Risk and Interest Rate Sensitivity Pillar 3 Regulatory Capital Disclosures (Unaudited): •Interest Rate Risk for Non-Trading Activities
