Background

M&T Bank Corporation ("M&T") and its wholly owned bank subsidiaries, M&T Bank and Wilmington Trust, National Association ("Wilmington Trust, N.A."), are required to comply with applicable capital adequacy standards established by the federal banking agencies.

In July 2013, the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation approved final rules establishing a new comprehensive capital framework, known as the "Basel III capital standards," for U.S. banking organizations. The Basel III capital standards substantially revised the risk-based capital requirements applicable to bank holding companies and their depository institution subsidiaries, including the definitions and the components of regulatory capital, the determination of risk-weighted assets, and other matters affecting banking institutions' regulatory capital ratios.

These rules went into effect as to M&T and its subsidiary banks on January 1, 2015, subject to phase-in periods for certain components and other provisions. The Basel III capital standards apply to M&T and all of its subsidiaries, referred to collectively as "the Company," except that each depository subsidiary is required to disclose its capital ratios.

Overview

In accordance with Pillar 3 of the Basel III capital standards, bank holding companies with total consolidated assets of \$50 billion or more, including M&T, are required to provide market participants certain information regarding their capital adequacy, including a summary of information about: corporate risk management framework and governance; the internal capital adequacy assessment process; and disclosures regarding credit, counterparty, interest rate, and other specified forms of risk. M&T does not meet the criteria to be considered an advanced approaches organization and, as a result, is required to provide disclosures under the standardized approach.

The Pillar 3 Regulatory Capital Disclosures provided within this document or in M&T's quarterly or annual public filings noted below and referenced in Appendix A of this document are presented in compliance with Sections 61 and 63 of Regulation Q – Part 217, Public Disclosures Related to Capital Requirements. M&T's Annual Report on Form 10-K for the year ended December 31, 2014 ("Form 10-K") filed with the Securities and Exchange Commission ("SEC") contains management's discussion of the overall corporate risk profile of the Company. The Pillar 3 Regulatory Capital Disclosures should be read in conjunction with Form 10-K, M&T's Quarterly Report on Form 10-Q for the quarter ended March 31, 2015 ("Form 10-Q") filed with the SEC and the Consolidated Financial Statements for Bank Holding Companies – FR Y-9C for the quarter ended March 31, 2015 ("FR Y-9C"). The accompanying Pillar 3 Regulatory Capital Disclosure Cross-reference Sheet (see Appendix A) indicates where the required disclosures are located. The Pillar 3 Regulatory Capital Disclosures have not been audited by M&T's external auditors.

Risk Management Framework and Governance

M&T's Enterprise Risk Management Framework represents the Company's overall risk management structure, including the policies, processes, controls and systems through which risk is managed on a daily basis. The Enterprise Risk Management Framework provides a common method for all employees, officers and directors to understand and communicate the types of risk that M&T faces in pursuit of its business objectives. It serves as an integral part of daily operations, business planning and capital planning, and is a foundational component of M&T's conservative risk management culture. It encompasses the significant aspects of risk management, and pertains to current and emerging risk considerations. These risks are described extensively in M&T's Form 10-K in Part I, Item 1A "Risk Factors." The major risks facing the Company and described therein include:

- Credit Risk
- Interest Rate Risk
- Liquidity Risk
- Operational Risk (including legal and fiduciary risks)
- Regulatory Compliance Risk
- Reputational Risk

Detailed discussions of the risks outlined above and other risks facing the Company are included within Form 10-K in Part 1, Item 1 "Business," and Part II, Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations." Furthermore, Part II, Item 7 under the heading "Forward-Looking Statements" includes a description of certain risks, uncertainties and assumptions identified by management that are difficult to predict and that could materially affect the Company's financial condition and results of operations, as well as the value of the Company's financial instruments.

The Enterprise Risk Management Framework supports the identification, measurement, monitoring and reporting of material risks with appropriate governance and oversight, thereby ensuring transparency, consistency and accountability for risk throughout the enterprise and adherence to the Company's risk appetite. The Enterprise Risk Management Framework incorporates the following components.

Risk Appetite Statement

M&T's Risk Appetite Statement ("RAS") articulates the types of risks that the Company is willing to accept and those that it seeks to avoid in pursuit of its business objectives. The RAS affirms the principles by which the Company identifies itself, while providing a central guide for decision-making processes. It serves as the link between the Company's corporate values and business operations by ensuring that all directors, officers and employees share a consistent understanding of the Company's appetite for risk, further enhancing the risk identification process and providing more clarity for aligning the Company's approach to capital management with its key risk appetite metrics.

Qualitative and quantitative risk metrics monitor emerging risks and provide specific measures that are used to monitor risk-taking relative to the Company's risk appetite.

Committee Roles and Responsibilities

M&T's integrated risk governance structure begins with oversight by members of the Board of Directors through the Risk Committee of the Board of Directors. Senior management oversight of the Enterprise Risk Management Framework is provided through a risk governance structure that includes the Management Risk Committee, which oversees eight Risk Governance Committees that identify and monitor specific risks applicable to the Company's businesses. The Management Risk Committee reports directly to the Risk Committee of the Board of Directors.

Risk Management Policies and Practices

The Enterprise Risk Management Framework incorporates a culture of risk ownership within the business lines, with independent risk management functions and Internal Audit serving as additional layers of control. Front-line business and operational support areas participate in the delivery of products or services to customers, as well as related servicing and technology. They are responsible for aligning their respective business strategies with the risk appetite established by M&T. These units are responsible for identifying key risks within their operations and establishing appropriate internal controls within the units. They are also responsible for establishing business line policies, procedures and limits in accordance with the RAS and monitor performance against those limits to ensure they operate within the boundaries of their risk-taking authority. The Risk Management area and related bank-wide functions (e.g. Credit Risk Oversight, Treasury Risk Oversight, Operational Risk, Corporate Compliance, Enterprise Security, Financial Controls, etc.), that are independent from the front-line business and operational support areas, establish the enterprise-wide risk management policies, procedures, methodologies and tools, including the risk governance framework. These functions oversee the establishment of risk limits and monitor compliance with those limits, in accordance with the risk appetite. Internal Audit, which reports to the Audit Committee of the Board of Directors, serves as an additional layer of control and is independent from the front-line business and operational support areas and the risk management functions. They provide assurance to senior management and the Board of Directors as to the effectiveness of risk management programs, policies, processes, practices, and controls, as well as adherence to regulatory standards.

Internal Capital Adequacy Assessment Process

M&T's Internal Capital Adequacy Assessment Process ("CAP") is the governance structure through which the Company assesses its capital requirements in relation to the material risks facing the organization, as identified through the Enterprise Risk Management Framework. The CAP is intended to ensure that M&T holds sufficient capital relative to its risk profile to support its business activities under a range of conditions, including adverse environments.

The Company's assessment of capital adequacy incorporates enterprise-wide capital stress tests that assess potential post-stress capital requirements in relation to available capital resources, considering the comprehensive inventory of vulnerabilities and scenarios identified through the

Enterprise Risk Management Framework. This approach considers material risks when assessing the capital needs stemming from potential exposures, whether on- or off-balance sheet. The CAP also incorporates explicit capital adequacy goals with respect to risk which inform the Company's capital management activities.

M&T's Capital Management Committee ("CMC") is the primary management body responsible for regular oversight of the CAP. The CMC proactively monitors M&T's prospective capital generation and capital requirements, as well as potential material risks facing the Company, leveraging the Enterprise Risk Management Framework. The CMC reports directly to M&T's Board of Directors, which is responsible for establishment of capital goals reflecting the organization's risk appetite and verifying that the Company's capital position considers material risks and is appropriate for its risk profile.

Regulatory Capital Ratios

As noted previously, the Basel III capital standards became effective for M&T and its subsidiary banks on January 1, 2015. Among other matters, the Basel III capital standards: (i) introduce a new capital measure called "Common Equity Tier 1" ("CET1") and related regulatory capital ratio of CET1 to risk-weighted assets; (ii) specify that Tier 1 capital consists of CET1 and "Additional Tier 1 capital" instruments meeting certain revised requirements; (iii) mandate that most deductions/adjustments to regulatory capital measures be made to CET1 and not to the other components of capital; and (iv) expand the scope of the deductions from and adjustments to capital as compared with the previous regulations. Under the Basel III capital standards, for most banking organizations, including M&T, the most common form of Additional Tier 1 capital is non-cumulative perpetual preferred stock and the most common forms of Tier 2 capital are subordinated notes and a portion of the allowance for loan and lease losses, in each case, subject to the specific requirements of the Basel III capital standards.

Pursuant to the Basel III capital standards, the minimum capital ratios for a banking organization to be considered adequately capitalized are as follows:

- 4.5% CET1 to risk-weighted assets;
- 6.0% Tier 1 capital (that is, CET1 plus Additional Tier 1 capital) to risk-weighted assets;
- 8.0% Total capital (that is, Tier 1 capital plus Tier 2 capital) to risk-weighted assets; and
- 4.0% Tier 1 capital to average consolidated assets as reported in consolidated financial statements (known as the "leverage ratio").

A more detailed discussion of regulatory capital requirements is included in Part I of M&T's Form 10-K under the headings "Capital Requirements" and "Regulatory Remedies under the FDIA."

The following table provides regulatory capital ratios for the Company, M&T Bank and Wilmington Trust, N.A. as of March 31, 2015:

Regulatory Capital Ratios March 31, 2015

	M&T	M&T	Wilmington
	_(Consolidated)	Bank	Trust, N.A.
Common equity Tier 1	9.78%	10.33%	57.32%
Tier 1 capital	11.68%	10.33%	57.32%
Total capital	14.92%	12.88%	57.87%
Tier 1 leverage	10.17%	9.02%	19.61%

Pursuant to the Basel III capital standards, non-advanced approaches banking organizations, including M&T, may make a one-time permanent election to exclude the effects of certain accumulated other comprehensive income or loss items reflected in shareholders' equity under generally accepted accounting principles in the U.S. ("GAAP"). M&T made that election during the first quarter of 2015.

In compliance with the Basel III capital standards, the Company reviewed the aggregate amount of surplus capital of insurance subsidiaries included in the regulatory capital of the consolidated group and has determined that it was not material.

For further information on capital refer to (i) Form 10-K in Part I, Item 1 under the heading "Stress Testing and Capital Plan Review" and Part II, Item 7 under the heading "Capital" and (ii) Form 10-Q in Part I, Item 2 under the heading "Capital" and note 6 of Notes to Financial Statements in Part I, Item 1.

Risk-weighted Assets

The Basel III capital standards also address asset risk weights that affect the denominator in banking institutions' regulatory capital ratios. Under the Basel III capital standards, M&T is subject to the standardized approach for determination of risk-weighted assets associated with its on- and off-balance sheet exposures. The following table summarizes the Company's standardized risk-weighted assets by certain categories, as defined in the Basel III capital standards.

Risk-weighted Assets March 31, 2015 (In thousands)

		M&T
	(Co	onsolidated)
Exposures to sovereign entities	\$	2,256,472
Exposures to depository institutions, foreign banks & credit unions		166,469
Exposures to public sector entities		326,407
Corporate exposures		58,990,483
Residential mortgage exposures		9,629,326
Statutory multifamily mortgages & pre-sold construction loans		994,806
High-volatility commercial real estate ("HVCRE") loans		1,542,581
Past due loans		860,817
Other as sets		3,380,587
Cleared transactions		1,810
Securitization exposures		1,435,259
Equity exposures		588,433
Total Risk-weighted Assets	\$	80,173,450

Credit Risk General Disclosures

The Company employs a long-term strategy and credit risk philosophy that focuses on stable, proven and conservative underwriting criteria and active portfolio monitoring which is consistent with the Company's risk appetite. The process integrates transparent qualitative and quantitative factors in the decision-making process with credit scorecards and models to create a robust underwriting and risk management framework. Past due loan status is measured based on the number of days that contractually required principal or interest payments are delinquent.

Commercial Exposures

- The Company utilizes a committee approval structure for large commercial relationships.
- Approval decisions are not solely made centrally, but are supplemented by regional committees that enhance centrally assembled corporate best practices with in-market expertise. Using a mix of centralized and regional committees, the Company is able to retain credit consistency while applying geographic expertise.
- A centralized underwriting function provides for consistent application of underwriting standards, including debt service and loan-to-value ratios, and independence from the business line.
- The Company's risk rating consists of two measurements, a Probability of Default and a Loss Given Default. These measurements, which incorporate expectations for default and give consideration to collateral types and values, are used to differentiate risk within the portfolio and consider the expectation of default for each loan.

Once approved, loans are subject to a granular approach to portfolio management which assists in the early identification of asset quality issues.

- Extensive monthly and quarterly reporting for Executive Management and the Board of Directors.
 - o Includes metrics such as portfolio size, industry concentrations, property type, delinquency, non-performing, charge-offs and risk rating distributions.
- Commercial Credit Quality Assurance ("CQA") team is responsible to ensure basic safety and soundness of the commercial loan and commercial real estate loan portfolios. The team's primary focus is the continuous monitoring, analysis, and general oversight of the commercial criticized asset portfolios to ensure these loans are properly risk-rated with appropriate accrual designation and timely recognition of charge-offs.

Consumer and Residential Real Estate Exposures

- Residential real estate loans are generally underwritten according to the standards set by the secondary markets, including by Fannie Mae and Freddie Mac.
- Consumer loan underwriting decisions are primarily based on Credit Score (FICO), Debt-to-Income, Revolving Debt-to-Income, Combined Loan-to-Value, Lien Position (Home Equity) and, when appropriate, Internal Custom Scorecards.
- The performance of the residential real estate loan and consumer loan portfolios is monitored very closely through a combination of reporting, feedback from the Customer Asset Management (collections) area, and management oversight. Reporting is varied and extensive, with reports being produced monthly or quarterly, including monthly dashboard reports that provide product performance metrics.

Further discussion of the credit quality of the loan portfolios is provided in M&T's Form 10-K and Form 10-Q, as referenced in Appendix A.

The following tables - Commercial Loans and Leases, Net of Unearned Discount; Commercial Real Estate Loans, Net of Unearned Discount; and Loans and Leases, Net of Unearned Discount - provide industry and geographic distribution of outstanding balances of the major types of loans as of March 31, 2015. Credit exposures relating to contractual commitments to extend credit and letters of credit are generally consistent with the geographic distribution of the major types of loans. For further information on the Company's commitments to extend credit and letters of credit, Appendix A provides references to M&T's Form 10-K, Form 10-Q and FR Y-9C.

Total		\$	14,521,789	\$	1,906,523

Maturity/repricing data for loans as of December 31, 2014 is presented on pages 77 and 82 of Form 10-K. Management believes that comparable amounts at March 31, 2015 were not materially different from those reported at December 31, 2014.

Counterparty Credit Risk

Although trading account activities represent less than 1% of the Company's total revenue and a very small component of its overall business, M&T maintains policies, controls and processes to manage its mark-to-market settlement and over-collateralization risks in conjunction with its entering into transactions with third parties. Outside of core lending activities, counterparty risk at M&T arises primarily from derivatives transactions with outside firms. The Company engages in those derivative transactions to meet the financial needs of customers who require interest rate swap or foreign exchange services. The Company generally mitigates the foreign exchange and interest rate risk associated with those customer activities by entering into offsetting positions with counterparties. The types and amounts of these activities are subject to a well-defined series of potential loss exposure limits established by management and approved by M&T's Board of Directors.

The Treasury Credit Risk Management group is responsible for a variety of risk management activities to control counterparty credit risk which include:

- Monitoring daily material changes in market-related metrics (stock price, public credit ratings and available credit default swap rates) of obligors.
- Daily monitoring of counterparty exposures by product.
- Compliance with Regulation F (restricts exposure to banks that are inadequately capitalized).
- Assigning internal risk ratings to each counterparty at relationship initiation and reassessing during annual or more frequent reviews.
- Reviewing all impaired securities (both individually and by investment category) regularly.
- Monitoring regularly the length of time that individual securities have been marketimpaired (that is, where fair value is less than amortized cost).

In addition, the Company sets trading limits for credit facilities that it extends to qualified trading counterparties based upon an approved and validated historic Value-at-Risk methodology.

Credit Risk Mitigation

The Company utilizes a loan grading system which is applied to all commercial loans and commercial real estate loans. Loans with an elevated level of credit risk are classified as "criticized" and are subjected to additional scrutiny and review by credit personnel. The timing and extent of potential losses, considering collateral valuation and other factors, and the Company's potential courses of action are regularly reviewed. Because collateral is a fundamental mitigant for credit risk, to the extent that loans are collateral-dependent, they are evaluated based on the fair value of the loan's collateral as estimated at or near the financial statement date. The main types of collateral taken by the Company include real estate, cash, depreciable assets, accounts receivable, inventory and other business-related assets. Residential real estate loans and consumer loans are generally evaluated collectively after considering such

factors as payment performance and recent loss experience and trends, which are mainly driven by current collateral values in the market place as well as the amount of loan defaults. Refer to Part II, Item 7 of Form 10-K and Part I, Item 2 of Form 10-Q each under the heading "Provision for Credit Losses" for further discussion on loan collateral, geographic distribution of loans and credit risk mitigation activities.

M&T utilizes legal agreements (primarily master netting agreements) that are established with counterparties to help reduce counterparty risk. Within a master netting agreement can be a Credit Support Annex, which establishes collateral posting rules for the counterparties to cover exposure in the agreement. A Credit Support Annex typically contains a few standard themes:

- Frequency of when collateral calls are made (typically daily).
- The minimum amount posted for new collateral calls (referred to as a minimum transfer amount).
- The type of collateral generally accepted by the Company which includes cash, U.S. Treasury securities and U.S. Agency securities. Other types of securities may be accepted, but only after consultation with Risk Management.

M&T's Legal department reviews all counterparty derivative agreements before execution.

The Company does not hedge credit risk associated with lending or derivatives transactions beyond collateral requirements.

Securitizations

The Company's initiation of securitization transactions has not been frequent nor significant. The Company has not recognized any losses as a result of having securitized assets. Refer to note 19 of Notes to Financial Statements in Form 10-K and note 11 of Notes to Financial Statements in Form 10-Q for discussion of the Company's securitization activities.

In accordance with the Basel III capital standards, the Company utilizes the Simplified Supervisory Formula Approach ("SSFA") to determine risk-weighted assets for its securitization exposures, which considers the Company's seniority in the securitization structure and risk factors inherent in the underlying assets.

The Company's investments in third party securitizations at March 31, 2015 are presented in the following table.

Securitizations March 31, 2015 (In thousands)

Securitizations by exposure type and capital treatment are shown below (a):

			S	SSFA risk-	Ca	apital impact of
	Expos	ure Amount	wei	ighted assets		RWA (b)
Collateralized mortgage obligations	\$	225,208	\$	1,418,272	\$	113,462
Collateralized debt obligations		29,704		16,171		1,294
Other		283		816		65
Total securitization exposure	\$	255,195	\$	1,435,259	\$	114,821

Securitizations by risk-weight bands and capital treatment are shown below (a):

	Expos	ure Amount	_	SFA risk- ghted assets	Ca	apital impact of RWA (b)
Securitization						
Zero to 250% risk weighting	\$	106,007	\$	103,208	\$	8,257
251% to 500% risk weighting		1,016		2,952		236
501% to 1250% risk weighting		148,172		1,329,099		106,328
Total securitization exposure	\$	255,195	\$	1,435,259	\$	114,821

- (a) Table relates to the Company as an investor in the securitization.
- (b) The capital impact of RWA is calculated by multiplying risk-weighted assets by the minimum total capital ratio of 8%.

Equities Not Subject To Market Risk Rule

Management of M&T's investment activities generally resides within the Company's Treasury Division. The Treasury Investment Policy, approved by M&T's Board of Directors, aligns with M&T's RAS and outlines the governance framework, operational guidelines, decision-making process, and investment criteria for all discretionary investment securities of the Company.

The Company had total equity exposures of approximately \$1.3 billion at March 31, 2015 that consisted predominantly of Bank Owned Life Insurance ("BOLI") separate accounts (\$484 million), tax-advantaged investments (\$303 million) consisting largely of investments in qualified affordable housing projects, stock of the Federal Reserve Bank of New York (\$209 million) and the Federal Home Loan Bank of New York (\$120 million), investments in mutual funds (\$62 million) and preferred stock issued by government-sponsored entities (\$26 million). The Company uses the simple risk-weight approach for its individual equity securities, the

alternative modified look-through approach for BOLI assets held in separate accounts and the full look-through approach for investments in mutual funds. These assets are reviewed for creditworthiness and evaluated regularly for impairment.

Nonpublic equities are generally recorded either at historical cost or using the equity method. Details of the Company's accounting policies for investment securities and the valuation of financial instruments are provided in note 1 of Notes to Financial Statements in Form 10-K.

Marketable equity securities are classified as available-for-sale and carried at fair value with net unrealized gains or losses reported within other comprehensive income (loss) in shareholders' equity. For regulatory capital purposes, net unrealized gains or losses recorded in accumulated other comprehensive income are predominantly excluded from CET1 and Tier 1 Capital, as the Company elected to "opt-out" of the option to reflect Accumulated Other Comprehensive Income in these metrics.

Equity in mutual funds maintained in the trading account are reported at fair value. Changes in fair value are recorded in trading account and foreign exchange gains in the Company's consolidated statement of income. At March 31, 2015, the Company does not have material equity exposure in the trading account.

There were no significant realized gains or losses arising from the sales or liquidations of equity securities for the quarter ended March 31, 2015.

The following table summarizes the Company's equities not subject to the market risk rule.

Equities Not Subject to Market Risk Rule March 31, 2015 (In thousands)

	Nonpublic	Public	Total
Amortized cost	\$ 1,178,424	\$ 118,246	\$ 1,296,670
Unrealized gains (a)	-	18,562	18,562
Latent revaluation gains (losses) (b)			
Fair value	\$ 1,178,424	\$ 136,808	\$ 1,315,232

- (a) The amount of unrealized gains included in Tier 2 Capital was \$8,353 or 45 percent of the total unrealized gains reported for the current period.
- (b) Management believes that any latent revaluation gains or losses that may exist are not material.

The risk-weighted assets and associated capital requirements for equities not subject to the market risk rule, calculated using the 8% minimum total risk-based capital ratio, follow.

				Risk-

Forward-looking Statements

This document, Form 10-K and Form 10-Q contain forward-looking statements that are based on expectations, estimates and projections about the Company's business, management's beliefs and assumptions made by management. Forward-looking statements are typically identified by words such as "believe," "expect," "anticipate," "intend," "target," "estimate," "continue," "positions," "prospects" or "potential," by future conditional verbs such as "will," "would," "should," "could," or "may," or by variations of such words or by similar expressions. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions ("Future Factors") which are difficult to predict and are subject to any impact arising from the risks and risk factors discussed herein and in the aforementioned documents. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. Forward-looking statements speak only as of the date they are made and the Company assumes no duty to update forward-looking statements.

Future Factors include changes in interest rates, spreads on earning assets and interest-bearing liabilities, and interest rate sensitivity; prepayment speeds, loan originations, credit losses and market values of loans, collateral securing loans and other assets; sources of liquidity; common shares outstanding; common stock price volatility; fair value of and number of stock-based compensation awards to be issued in future periods; the impact of changes in market values on trust-related revenues; legislation and/or regulation affecting the financial services industry as a whole, and M&T and its subsidiaries individually or collectively, including tax legislation or regulation; regulatory supervision and oversight, including monetary policy and capital requirements; changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or regulatory agencies; increasing price and product/service competition by competitors, including new entrants; rapid technological developments and changes; the ability to continue to introduce competitive new products and services on a timely, cost-effective basis; the mix of products/services; containing costs and expenses; governmental and public policy changes; protection and validity of intellectual property rights; reliance on large customers; technological, implementation and cost/financial risks in large, multi-year contracts; the outcome of pending and future litigation and governmental proceedings, including tax-related examinations and other matters; continued availability of financing; financial

resources in the amounts, at the times and on the terms required to support M&T and its subsidiaries' future businesses; and material differences in the actual financial results of merger, acquisition and investment activities compared with M&T's initial expectations, including the full realization of anticipated cost savings and revenue enhancements.

These are representative of the Future Factors that could affect the outcome of the forward-looking statements. In addition, such statements could be affected by general industry and market conditions and growth rates, general economic and political conditions, either nationally or in the states in which M&T and its subsidiaries do business, including interest rate and currency exchange rate fluctuations, changes and trends in the securities markets, and other Future Factors. A detailed discussion of Risk Factors is included in Form 10-K.

M&T Bank Corporation Pillar 3 Regulatory Capital Disclosure Cross-reference Sheet For the Quarter Ended March 31, 2015

In compliance with the Pillar 3 Regulatory Capital Disclosure Requirements, M&T Bank Corporation ("M&T") has provided the following summary of the required disclosure locations. All documents referenced, except Form 10-K for the year ended December 31, 2014, are as of or for the quarter ended March 31, 2015.

General Qualitat	ive Disclosure Requirement			
	For each separate risk area described in tables 5 through 10, the bank holding company must describe its risk management objectives and policies, including: strategies and processes; the structure and organization of the relevant risk management function; the scope and nature of risk reporting and/or measurement systems; policies for hedging and/or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges/mitigates.	Pillar 3 Regulatory Capital Disclosures (Unaudited): Risk Management Framework and Governance	2-3	
Credit Risk Gene	ral Disclosures			
Qualitative: (a)	The general qualitative disclosure requirement with respect to credit risk (excluding counterparty credit risk disclosed in accordance with Table 6) including the: (1) Policy for determining past due or delinquency status; (2) Policy for placing loans on nonaccrual; (3) Policy for returning loans to accrual status; (4) Definition of and policy for identifying impaired loans (for financial accounting purposes); (5) Description of the methodology that the bank holding company uses to estimate its allowance for loan and lease losses, including statistical methods used where applicable; (6) Policy for charging-off uncollectible amounts; and (7) Discussion of the bank holding company's credit risk management policy.	Form 10-K: *MD&A-Provision for Credit Losses (Unaudited) *Note 1-Significant Accounting Policies (Audited) *Note 3-Investment Securities (Audited) *Note 4-Loans and Leases (Audited) *Note 5-Allowance for Credit Losses (Audited) *Note 21-Commitments and Contingencies (Audited) Form 10-Q (Unaudited): *MD&A-Provision for Credit Losses *MD&A-Capital *Note 1-Significant Accounting Policies *Note 3-Investment Securities *Note 4-Loans and Leases and the Allowance for Credit Losses *Note 13-Commitments and Contingencies Fillar 3 Regulatory Capital Disclosures (Unaudited): Credit Risk General Disclosures	6-10	Form 10-K pg 57-69 pg 103-107 pg 109-113 pg 113-119 pg 120-125 pg 162-163 Form 10-Q pg 63-72 pg 77-81 pg 8 pg 9-12 pg 12-22 pg 45-46
Quantitative (b)	Total credit risk exposures and average credit risk exposures, after accounting offsets in accordance with GAAP, without taking into account the effects of credit risk mitigation techniques (for example, collateral and netting not permitted under GAAP), over the period categorized by major types of credit exposure. For example, bank holding companies could use categories similar to that used for financial statement purposes. Such categories might include, for instance: (1) Loans, off-balance sheet commitments, and other non-derivative off-balance sheet exposures; (2) Debt securities; and (3) OTC derivatives.	Form 10-K: *MD&A-Average Balance Sheet and Taxable-equivalent Rates (Unaudited) *Note 3-Investment Securities (Audited) *Note 4-Loans and Leases (Audited) *Note 5-Allowance for Credit Losses (Audited) *Note 10-Derivitive financial instruments (Audited) *Note 21-Commitments and Contingencies (Audited) *Note 21-Commitments and Contingencies (Audited) *Form 10-Q (Unaudited): *MD&A-Average Balance Sheet and Annualized Taxable-equivalent Rates *Note 3-Investment Securities *Note 4-Loans and Leases and the Allowance for Credit Losses *Note 10-Derivitive Financial Instruments *Note 10-Derivitive Financial Instruments *Note 13-Commitments and Contingencies *FR Y-9C (Unaudited): *Schedule HC-B - Securities *Schedule HC-L - Derivatives and Off-Balance-Sheet Items		Form 10-K pg 47 pg 109-113 pg 113-119 pg 120-125 pg 148-151 pg 162-163 Form 10-Q pg 89-90 pg 9-12 pg 12-22 pg 29-32 pg 45-46 FR Y-9C Schedule HC-B Schedule HC-L
(c)	Geographic distribution of exposures, categorized in significant areas by major types of credit exposure.	Pillar 3 Regulatory Capital Disclosures (Unaudited): •Table-Commercial Loans and Leases, Net of Unearned Discount •Table-Commercial Real Estate Loans, Net of Unearned Discount •Table-Loans and Leases, Net of Unearned Discount	8 9 10	
(d)	Industry or counterparty type distribution of exposures, categorized by major types of credit exposure. (e)	By major industry or counterparty type: (1) Amount of impaired loans for which there was a related allowance under GAAP; (2) Amount of impaired loans for which there was no related allowance under GAAP; (3) Amount of loans past due 90 days and on nonaccrual; (4) Amount of loans past due 90 days and still accruing; (5) The balance in the allowance for loan and leases losses at the end of each period, disaggregated on the basis of the bank holding company's impairment method. To disaggregate the information required on the basis of impairment methodology, an entity shall separately disclose the amounts based on the requirements in GAAP; and (6) Charge-offs during the period.	Form 10-K (Audited): Note 4-Loans and Leases Note 5-Allowance for Credit Losses Form 10-Q (Unaudited): Note 4-Loans and Leases and the Allowance for Credit Losses		Form 10-K pg 113-119 pg 120-125 Form 10-Q pg 12-22
(f)	Amount of impaired loans and, if available, the amount of past due loans categorized by significant geographic areas including, if practical, the amounts of allowance related to each geographical area, further categorized as required by GAAP.	10-K (Audited): Note 5-Allowance for Credit Losses Form 10-Q (Unaudited): Note 4-Loans and Leases and the Allowance for Credit Losses - Impaired and past due loans are aggregated by loan type for purposes of determining the allowance for credit losses.		Form 10-K pg 120-125 Form 10-Q pg 12-22
(g)	Reconciliation of changes in the allowances for loan and lease losses ("ALLL").	Form 10-K (Audited): Note 5-Allowance for Credit Losses Form 10-Q (Unaudited): Note 4-Loans and Leases and the Allowance for Credit Losses		Form 10-K pg 120-125 Form 10-Q pg 12-22
(h)	Remaining contractual maturity delineation (for example, one year or less) of the whole portfolio, categorized by credit exposure.	Form 10-K: *MD&A-Liquidity, Market Risk, and Interest Rate Sensitivity (Unaudited) FR Y-9C (Unaudited): *Schedule HC-B - Securities *Schedule HC-L - Derivatives and Off-Balance-Sheet Items		Form 10-K pg 75-83 FR Y-9C Schedule HC-B Schedule HC-L

Canaral Disales	us for Countagorth Cradit Disk Dalated Superiors			
Qualitative:	The general qualitative disclosure requirement with respect to OTC derivatives, eligible margin loans, and repo-style transactions, including a discussion of: (1) The methodology used to assign credit limits for counterparty credit exposures; (2) Policies for securing collateral, valuing and managing collateral and establishing credit reserves; (3) The primary types of collateral taken; and (4) The impact of the amount of collateral the bank holding company would have to provide given a deterioration in the bank holding company's own creditworthiness.	Form 10-K (Audited): Note 1-Significant Accounting Policies Note 18-Derivative Instruments Note 20-Fair Value Measurements Form 10-Q (Unaudited): Note 1-Significant Accounting Policies Note 10-Derivative Financial Instruments Note 12-Fair Value Measurements Pillar 3 Regulatory Capital Disclosures (Unaudited): Counterparty Credit Risk and Credit Risk Mitigation Form 10-K (Audited):	11-12	Form 10-K pg 103-107 pg 148-151 pg 152-162 Form 10-Q pg 8 pg 29-32 pg 33-45
Quantitative (b)	Gross positive fair value of contracts, collateral held (including type, for example, cash, government securities), and net unsecured credit exposure. A bank holding company also must disclose the notional value of credit derivative hedges purchased for counterparty credit risk protection and the distribution of current credit exposure by exposure type.	Note 18-Derivative Instruments Form 10-Q (Unaudited): Note 10-Derivative Instruments FR Y-9C (Unaudited): Schedule HC-L - Derivatives and Off-Balance-Sheet Items Pillar 3 Regulatory Capital Disclosures (Unaudited): Counterparty Credit Risk and Credit Risk Mitigation	11-12	pg 148-151 Form 10-Q pg 29-32 FR Y-9C Schedule HC-L
(c)	Notional amount of purchased and sold credit derivatives, segregated between use for the bank holding company's own credit portfolio and in its intermediation activities, including the distribution of the credit derivative products used, categorized further by protection bought and sold within each product group	Not applicable.		
Credit Risk Mitig				L
Qualitative: (a)	The general qualitative disclosure requirement with respect to credit risk mitigation including: (1) Policies and processes for collateral, valuation and management; (2) A description of the main types of collateral taken by the bank holding company; (3) The main types of guarantors/credit derivative counterparties and their creditworthiness; and (4) Information about (market or credit) risk concentrations with respect to credit mitigation.	Form 10-K: **MD&A-Provision for Credit Losses (Unaudited) **Note 1-Significant Accounting Policies (Audited) **Note 3-Investment Securities (Audited) **Note 4-Loans and Leases (Audited) **Note 5-Allowance for Credit Losses (Audited) **Note 18-Derivative Financial Instruments (Audited) **Note 20-Fair Value Measurements (Audited) **Form 10-Q (Unaudited): **MD&A-Provision for Credit Losses **Note 1-Significant Accounting Policies **Note 3-Investment Securities **Note 4-Loans and Leases and the Allowance for Credit Losses **Note 10-Derivative Financial Instruments **Note 12-Fair Value Measurements **Pillar 3 Regulatory Capital Disclosures (Unaudited): Credit Risk Mitigation	11-12	Form 10-K pg 57-69 pg 103-107 pg 109-113 pg 113-119 pg 120-125 pg 148-151 pg 152-162 Form 10-Q pg 63-72 pg 8 pg 9-12 pg 12-22 pg 29-32 pg 33-45
Quantitative (b)	For each separately disclosed credit risk portfolio, the total exposure that is covered by eligible financial collateral, and after the application of haircuts.	Form 10-K: •MD&A-Provision for Credit Losses (Unaudited) •Note 18-Derivative Financial Instruments (Audited) Form 10-Q (Unaudited): •MD&A-Provision for Credit Losses •Note 10-Derivative Financial Instruments Pillar 3 Regulatory Capital Disclosures (Unaudited): Credit Risk Mitigation	11-12	Form 10-K pg 57-69 pg 148-151 Form 10-Q pg 63-72 pg 29-32
(c)	For each separately disclosed portfolio, the total exposure that is covered by guarantees/credit derivatives and the risk-weighted asset amount associated with that exposure.	Pillar 3 Regulatory Capital Disclosures (Unaudited): Table-Guarantees	10	
Securitization				
Qualitative: (a)	The general qualitative disclosure requirement with respect to a securitization (including synthetic securitizations), including a discussion of: (1) The bank holding company's objectives for securitizing assets, including the extent to which these activities transfer credit risk of the underlying exposures away from the bank holding company to other entities and including the type of risks assumed and retained with resecuritization activity; (2) The nature of the risks (e.g. liquidity risk) inherent in the securitized assets; (3) The roles played by the bank holding company in the securitization process and an indication of the extent of the bank holding company's involvement in each of them; (4) The processes in place to monitor changes in the credit and market risk of securitization exposures, including how those processes differ for resecuritization exposures; (5) The bank holding company's policy for mitigating the credit risk retained through securitization and resecuritization exposures; and (6) The risk-based capital approaches that the bank holding company follows for its securitization exposures including the type of securitization exposure to which each approach applies.	Note 19-Variable interest entities and asset securitizations Form 10-Q (Unaudited): Note 1-Significant Accounting Policies Note 11-Variable interest entities and asset securitizations Pillar 3 Regulatory Capital Disclosures (Unaudited): Securitizations	12-13	Form 10-K pg 103-107 pg 151-152 Form 10-Q pg 8 pg 32-33
(b)	A list of: (1) The type of securitization SPEs that the bank holding company, as sponsor, uses to securitize third-party exposures. The bank holding company must indicate whether it has exposure to these SPEs, either on- or off-balance sheet; and (2) Affiliated entities: (i) That the bank holding company manages or advises; and (ii) That invest either in the securitization exposures that the bank holding company has securitized or in securitization SPEs that the bank holding company sponsors.
