## M&T Bank Releases New, Improved Mobile Banking Platform

### Personal and Business Banking Apps now available for Android™, iPhone® Apps enhanced

BUFFALO, N.Y., Aug. 27, 2014 /PRNewswire/ -- [M&T Bank](#) has launched upgraded apps and mobile banking websites for its personal and business customers. The new mobile experience features a cleaner, more intuitive design that's easier to use. Customers can expect a simplified navigation and fewer steps to complete tasks - like paying bills and making transfers. The completely redesigned M&T Mobile Banking and M&T Mobile Banking for Business apps are available for Android and iPhone.

"This release is part of our continuing investment in technology that improves the customer experience," said Mike Shryne, M&T senior vice president of alternative banking. "The apps and mobile sites give customers the tools and security they need most, with a new design that helps them bank quickly and get back to life. Our development process is strongly informed by customer feedback, and our goal is to make it easy for our customers to do business with us when, where and how they prefer to."

Other features include an enhanced branch and ATM finder with integrated Google Maps, as well as a virtual "augmented reality" locator, exclusively for iPhone users. Promotional offers and a products and a services directory will also be available on the new apps and mobile websites.

The new mobile platform is just one in a number of recent and upcoming enhancements to M&T's digital services. M&T InfoPLU\$ for Mobile and Tablet, a new app for its commercial banking clients, was released in June, and M&T plans to upgrade its online banking platform by year's end.
